**can do for
You!**

**Training begins in
May 2004
for Administrative Officers,
Secretaries, Supervisors,
Managers and
HR Specialists**

Why e-Payroll?

e-Gov Vision

The President's vision for reforming the Federal Government emphasizes that the "government needs to reform its operations – how it goes about its business and how it treats the people it serves."

To effectively drive this exciting vision, our government must be:

- Citizen-centered
- Results-oriented
- Market-based

With these principles as the foundation for the e-Gov initiative, NASA has begun implementing a strategy for successful realization of the vision.

What this means for you

Significant improvements are already underway, with you in mind.

From improved processes to enterprise systems, our government is transforming the way we do "business"...

And you are making it happen.

What is e-Payroll?

Expanded Electronic Government (e-Gov)

For NASA, e-Gov begins with e-Payroll...

Expanded Electronic Government is one of the initiatives in the *President's Management Agenda*. e-Gov targets an innovative approach to improving operations: the implementation of electronic (e-) or web-based technologies.

e-Payroll, NASA's first e-Gov achievement, is designed to standardize, consolidate and integrate Federal civilian payroll services through:

- simplifying and standardizing HR/Payroll policies and procedures
- better integrating Payroll, Human Resources, and Finance functions

Though most of the enhancements are transparent to employees, behind the scenes, your e-Payroll system will have reached new heights of efficiency!

The NASA Focus

NASA's commitment to excellence continues! In August 2004, NASA will implement the new e-Payroll system!

NASA selected the Department of Interior's (DOI) National Business Center (NBC) as our payroll provider.

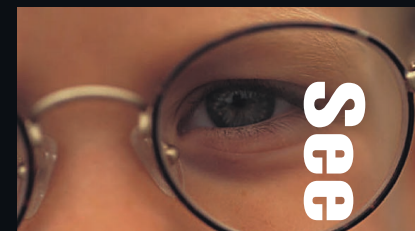

From a center perspective, e-Payroll offers Headquarters (HQ) many benefits, such as:

- automated personnel and pay processes (SF 52) workflow
- standardization of overall personnel and payroll processes

the bigger picture

NASA will continue to actively engage in the President's vision for a unified e-Government advancing toward a tomorrow of e-possibilities...ew Text

Keep an eye out for upcoming announcements via email, InfoCom, Heads Up, and the HQ e-Payroll website.

See the difference...
